

4. Our Job: Stewards of Creation- Activity 11

ENVIRONMENTAL SKITTLES

Equipment: Empty plastic bottles or other suitable skittles, ball, paper, glue or tape, and pens.

Activity:

- 🐾 Talk about the different things which spoil and damage the environment and cause problems for animals. Ideally get the children to identify/suggest these e.g. big companies destroying rainforests, pollution etc.
- 🐾 Write or draw these damaging things on pieces of paper, and tape them to skittles.
- 🐾 Play skittles and see who can knock the most down! With older children it would even be possible to decide to debate which factors caused the most damage, and to attribute different points to different skittles.

Purpose/Teaching: Human beings have a responsibility to take care of the Earth which God has made. Looking after the environment is a fundamental part of our Christian life and discipleship, not just an optional extra if we have time for it.
